Speakers

Dr. Travis Mulliniks is range cow nutritionist at the University of Nebraska and located at the West Central Research and Education Center in North Platte, NE. He grew up on a cow-calf operation in eastern Oklahoma and received his BS degree in Animal Science from Oklahoma State University. He earned a MS and PhD in Range Nutrition from New Mexico State University. Dr. Mulliniks' research and extension objectives consist of developing an applied cow-calf research program that emphasizes economically viable management options through enhanced productivity and strategic nutritional management.

Dr. Craig Payne received his DVM degree from the University of Missouri-College of Veterinary Medicine in 1993. Upon graduation he practiced at the Animal Medical Center in Marshfield, MO for one year before moving to Sedalia, MO where he became a partner at the Sedalia Veterinary Center. He practiced in Sedalia until 2005 at which time he moved to Kingsville, TX where he pursued an MS degree in Agribusiness from the King Ranch Institute for Ranch Management at Texas A&M – Kingsville. After completing his MS degree in 2007, Dr. Payne accepted a position as an extension veterinarian for the University of Missouri and is currently the Director of the Department of Veterinary Extension and Continuing Education at MU-College of Veterinary Medicine.

Dr. Jordan Thomas is an assistant extension professor and state beef reproduction specialist in the Division of Animal Sciences at the University of Missouri. Dr. Thomas is a Missouri native and University of Missouri alumnus, having earned his PhD in Animal Sciences with an emphasis in Reproductive Physiology in 2017. In addition to extension and education programming associated with the National Center for Applied Reproduction and Genomics, Dr. Thomas maintains an active applied research program in reproductive management of beef cattle. The primary research focus of the Thomas lab is control of the bovine estrous cycle, specifically to facilitate use of reproductive technologies such as timed artificial insemination and embryo transfer.

IMPROVING THE BOTTOM LINE OF BREEDING

- **Pre-calving nutritional strategies: Am I staying ahead or getting behind?**
- **Vaccines and implants: effects on production and reproduction**
- **Reproductive performance: Are you leaving money on the table?**

January 14, 2020 - Greenfield, IA

January 15, 2020 - Savannah, MO

January 16, 2020 - Syracuse, NE

About the Conference

For 35 years, the Three-State Beef Conference has provided beef cattle producers in Iowa, Missouri and Nebraska with a current update on current and critical cow-calf and stocker topics affecting producers in the three-state area.

Attendees of this annual event have the opportunity to hear from specialists at three top-notch land-grant universities, as well as other industry experts.

The registration fee is \$25 per person and includes the evening meal and a copy of the conference proceedings. Early RSVPs help with meal plans and keeps costs down. For more information, contact your local university extension office.

**Preregistrations are appreciated by
Friday, Jan.10, 2020.**

If you need accommodations because of a disability, have emergency medical information to share, have dietary restrictions or needs or need special arrangements in case the building must be evacuated, please inform us immediately.

Special thanks to the Adair County Cattlemen for the support of the Iowa meeting.
