

Advanced Calving Clinics

Even if you've calved hundreds of cows in your lifetime, you'll want to attend this workshop. From managing difficult deliveries, learning tricks to snag a leg that is back, knowing first aid at calving time and understanding when to call your vet for assistance, everyone can learn something new. Experts will share information on neonatal calf care to improve the long-term health of those calves, and how feeding the cow in late gestation and early lactation has huge implications on the calving process, colostrum quality and quantity, and next year's calves as well.

Workshop Agenda

Monday, February 4, 2019
