

Spring 2014 Beef Management Update

Managing fescue and getting good pregnancy rates on late spring calving cows continues to be a challenge. This workshop will cover strategies from some projects in Arkansas -- improving cow calving rates and reducing the impact of fescue alkaloids -- that also apply to Iowa.

7 p.m. at both locations

May 20 – Afton Community Center

West side of town square, Afton

May 21 – Rathbun Regional Water Association Headquarters

16166 Hwy J29, Appanoose County

Presenters and topics

Dr. Ken Coffey, University of Arkansas

- *Fescue management update*
- *Fall vs. spring calving*
